[ISO/IEC](#) [JTC1/SC22/WG14](#) is the international standardization working group for the programming language C.

The current C programming language standard (C11) [ISO/IEC 9899](#) was adopted by ISO and IEC in 2011.

To obtain the international standard, please contact your national [member body](#).

Work on [projects](#) and their [milestones](#) include:

- [9899: Programming Language C](#)
- [Defect Reports and Record of Response](#)
- [TR\\_18037: Embedded C](#)
- [TR\\_19769: Extensions for the programming language C to support new character data types](#)
- [TR\\_24731-1: Extensions to the C Library Part I: Bounds-checking interfaces](#)
- [TR\\_24731-2: Extensions to the C Library Part II: Dynamic allocation functions](#)
- [TR\\_24732: Extensions for the programming language C to support decimal floating point arithmetic](#)
- WG14 has finished revising the C standard, under the name C11. A [charter](#) for the revision of the standard describes the rules for what has been done.
- [TR\\_24747: Programming language C - Extensions for the C language library to support mathematical special functions](#)
- The [rationale for the C99 standard](#) is available.

Other information available is:

- The [WG document register](#) including the documents
- [New\\_WG\\_wiki](#) (protected, only for members)
- [WG internal information](#) (protected, only for members)
- Information on [WG meetings](#)
- [WG14 Business Plan and Convener's Report 2012](#)
- Working Group Standing Document 1, [mailings and meetings information](#)
- Working Group Standing Document 2, [Informal Study Group Organization Information](#)
- Working Group Standing Document 3, [List of issues not covered by DRs for C11](#)
- [ISO/IEC 2382:2015 Information technology — Vocabulary](#) (freely available standard)
- [Contacts: membership, liaisons and related work](#)

If you want further information, or want to participate, please contact your national [member body](#) or one of the [contact addresses](#) of the WG.
